- Framework as I can : Laravel, Codeingiter,React JS,Bootstrap, Jquery, Tailwinds
- Database MYSQL (Mariadb) & No SQL Firebase & spreadsheets & json
- Git, Github, Gitlab, Termux

## ABOUT ME

I am a student currently pursuing vocational education in Grade 9 Junior High School. Now I live in South Bogor, West Java, Indonesia. Focusing on the field of Website Development or Web Development, I acquired front-end engineering skills since 5th grade elementary school and back-end engineering skills since 8th grade junior high school. By managing my time between studying at school and working on my web development projects effectively, I can do it as best as possible. I am now proficient in creating commercial-based as well as static/interactive websites. The languages I understand include HTML, CSS, JAVASCRIPT, JQUERY, PHP, and I rely on frameworks such as React JS, Node.js beginner, Laravel or CodeIgniter, Bootstrap or Tailwind. Additionally, I utilize databases through Google Sheets or MYSQL PhpMyAdmin. I am capable of solving debugging problems with great attention to detail and creativity.

## WORK EXPERIENCE

**Freelance (friend's project)**
2024 – Now

### Web Developer
Creating a website that depends on client needs, whether it's designing the purpose of a website, web structure, tech stack used, CMS, UI/UX design, and development, as well as backend development such as API connection, Database, and others.

**Volunteer Web Dev GSJA BETLEHEM**
2023 – Now

### Front-end Engineer
Developing a web app for GSJA BETLEHEM Church in Bogor Tengah, West Java, Indonesia. Utilizing the Laravel tech stack from PHP language, applying designs from the Product Design & Research team into a development mode (code). Also, assisting in development, including fixing bugs, debugging, helping with API calls, CDN, and contributing to the SQL database structure, bit by bit.

**My Website Project**
2020 – Now

### Web Developer
Creating a website tailored to personal and community needs, and working on numerous training projects, totaling approximately 20 projects. The process involves designing the purpose of the website, web structure, selecting the tech stack, CMS, UI/UX design, and development mode. Additionally, it includes backend development such as API connection, Database, and other elements.

**Volunteer Chruch**
2022 – Now

### Cameraman & Multimedia Event
Operating camera equipment for worship visualization needs, whether it is a mirrorless camera or camcorder camera, apart from operating the camera, I also optimize the connection of the camera to the LED that will be used together with the team. Multimedia Events I take care of the media visualization part, be it showing in the form of videos or photos as well as PowerPoint, lyric text and LED backgrounds.

**Video Editing**
2023 – Now

### Video Editing
Operating editing software to edit various types of videos, the types of software that I understand for Android are Capcut, Kinemaster. For PC I understand Adobe Premiere pro. My experience has been editing a lot of videos, both for school assignments and editing cinematic videos for my own needs. and editing for church video lyrics. Even though I edit, I mostly use Android software, because I don't currently have a laptop, for PC software I only edit when I have time and I have a laptop or PC.
